Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Akada et al. (5900995) in view of Shirie (5130851).

Regarding claim 1, Akada et al. discloses a lens barrel of a camera, in figure 23, comprising: a plurality of cylindrical bodies expandable in a multistage fashion (1081, 1082, 1083); an optical lens system constituted by a plurality of lens groups disposed along an optical axis (dashed line), all of said plurality of lens groups being accommodated in a leading body, among said plurality of cylindrical bodies (figure 23); and a driving source (1084) incorporated in said leading cylindrical body, wherein said optical lens system comprises at least two fixed lens groups (1081 and 1083) secured to said leading cylindrical body (10) and at least one movable lens group (1082) movable along the optical axis upon receiving a driving force of said driving source (col. 18, lines 29-34) except that it does not show a leading cylindrical body. Shirie shows, in figure 1, that it is known to provide a cylindrical leading body (10) for enclosing the interior elements of the lens barrel. Therefore it would have been obvious to someone of

Art Unit: 2873

ordinary skill in the art at the time the invention was made to combine the teaching of Akada et al. with the leading cylindrical body of Shire for the purpose of enclosing the interior elements of the lens barrel.

Regarding claim 2, Akada et al. discloses, in figure 23, a lens barrel wherein said movable lens group (1082) is disposed between said two fixed lens groups (1081 and 1083).

Regarding claim 3, Akada et al. discloses, in figure 23, a lens barrel wherein a movable lens frame (not numbered) attached to said movable lens group (1082); a threaded shaft (1085), in mesh with said movable lens frame, oriented along the optical axis of said plurality of lens groups; and a rotary driving section for supplying a rotary force to said threaded shaft to rotate said movable lens group along the optical axis direction (col. 18, lines 31-34).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Murakami et al. (593284) discloses a driving apparatus for driving an object by an electromagnetic force.

Peterson (3928859) discloses an improved camera which features an improved shutter-iris mechanism.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2873

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
